***Election/Restrictions***

1. Applicant's election with traverse of the invention of Group II, claims 13 to 22, in the reply filed on 8-17-2006 is acknowledged. The traversal is on the ground(s) that the two claim groups are so related that a thorough search for one will encompass the other. This is not found persuasive because the Examiner's position remains that the method limitations of claim Group I results in differences between the claim groups that will results in differences in the search for the two claim groups and creates a burden that justifies the restriction requirement. Claims 1 to 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

The requirement is still deemed proper and is therefore made FINAL.

***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Specification***

3. The title of the invention is not adequately descriptive. A new title is required that is more clearly indicative of the invention to which the claims are directed by providing some indication of the inventive aspect/structure of the magnetic recording medium.

***Claim Objections***

4. Claims 16 and 19 are objected to because of the following informalities: claim 16 – line 2, "the protective layer" lacks proper antecedent basis.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 15 is rejected under 35 U.S.C. 102(e) as being anticipated by Hieda et al (U.S. 6,977,108). Hieda discloses (figure 12) sealed divided recording elements (28), a protective layer (30), and non-magnetic material 21 in the form of a non-magnetic substrate with protrusions formed in gaps in between the divided recording elements.

***Allowable Subject Matter***

7. Claims 13, 14, 17, 20, 21, and 22 are allowed. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
